

THE INDUSTRY STANDARD NOW HAS HIGHER STANDARDS.

**Angus GS is not resting on past accomplishments.
There's more work to be done.**

With the addition of 22,000 SNPs, Angus GS becomes the unmatched Angus specific genomic profiler. It provides greater power for traits including calving ease, birth weight, marbling, female fertility and more.

Logo displayed on all animal lots that have been SNP tested and included in a Genomic Evaluation, therefore shows Genomics under Traits Analysed. All AngusGS 75K tested animals have had parentage run by PBB DNA using the Helical system. This can include both sire and dam verification.

Realise your operation's full potential.
