### Suggested Recording Date

Plan the best dates to record measurements on your animals. The suggested recording dates are calculated by adding the expected recording age in days of the trait to the mean date of birth for your animals. You can adjust each trait's expected recording age below.

Select the calving year using the Year option. If you want more control over the animals considered from your herd you can use Date of Birth Between options to only get animals born between two dates.

Year: 2024 Date of Birth Between: 01/01/2024 - 31/12/2024

Weaning Weight: 200 days Yearling Weight: 400 days Mature Weight: 600 days

## 5 To view another year group, simply select a different year group
