4 Click Load Data.

The screenshot shows the 'Calf Entry Form' interface. At the top, there's a form field with the text '0400_20260910_CalfEntryForm'. Below it, 'Stud 0400' is displayed. A progress bar shows three steps: 'Choose Import Template', '2 Enter Data', and '3 Summary'. The 'Enter Data' step is active. Under 'Calf Entry Form', there's a sub-header 'Use this template to register your calves' and a link 'More Help'. Below this, there are two input fields: 'Recording Date' with a date picker set to 'dd/mm/yyyy' and 'Management Group'. Below these fields are instructions: 'Set the Recording Date for any traits without their own date' and 'Set the Management Group for any traits without their own group'. At the bottom, there's a table with columns: 'Dam Animal ID', 'Sire Animal ID', 'Name*', 'NAIT ID', and 'Tattoo*'. Above the table, there's a 'Filter...' input field, a 'Load Data' button (circled in orange), a 'Clear Table' button, a download icon, and a 'View:' dropdown showing '0 rows'.

5 Click the Select Dams tab.

The screenshot shows the 'Calf Entry Form' with a modal window open for 'Import Data'. The modal has four tabs: 'Copy and Paste', 'Upload File', 'Select Dams' (highlighted with an orange circle), and 'Upload Herdmaster File'. The 'Copy and Paste' tab is selected, showing the text 'Copy and paste cells from spreadsheet'. The background shows the same 'Calf Entry Form' as in the previous screenshot, but the 'Load Data' button is no longer circled. The 'Import Data' modal also has a 'Next' button with a right arrow.

6 Click the dam filter field.

Copy and Paste Upload File **Select Dams** Upload Herdmaster File
